

THE INTERNATIONAL CASPIAN STUD BOOK

Updated December 2018

The International Caspian Stud Book (ICSB) is produced by the International Caspian Society (ICS) on behalf of the successors of The British Caspian Society (now Caspian Horse Society) who compiled the first printed edition in 1975 in conjunction with the Royal Horse Society of Iran.

Horses are not registered directly into the ICSB but rather into National or Regional Stud Books, the ICSB being a compilation of all those entries.

Each of these studbooks assign a local reference number to which is added a unique ICSB number. The accuracy of the ICSB data is dependent on that of the contributing registries.

All member studbooks have agreed to use the same Breed Standard as published by the ICS. A list of member societies is shown in the Societies and Officers section under "Content" on the ICS home page. The Breed Standard is also listed under "Content".

IMPORTANT: Please note that Societies not appearing on this list may not adhere to ICS standards and their registrations are not eligible to be included in the ICSB. The International Caspian Society advises purchasers to check that any Caspian mare or stallion that they may be considering for breeding purposes is listed in the International Caspian Stud Book and that they register their foals with an ICS member society.

This web edition of the studbook contains details of all the horses registered with the ICSB. It is made freely available to consult on the site in a searchable but 'read only' format.

Access to additional live data is possible for subscribers.

Key to symbols following the name of the horse:

* Foundation stock (found in the wild or in a environment outside of organized breeding with one or both parents unknown, adopted after rigorous evaluation)

+ Deceased

Where an 'X' precedes the registration number of the horse this indicates that the sire was not licensed at the time of conception (see Rules of Registration).

Where a 'P' precedes the registration number of the horse this indicates that there are no DNA test results for this horse (see Rules for Registration)

Please note: ICSB No 1994—Lall (gelding) included only as a parent of assessed offspring, upon some of which breeding restrictions have been imposed.

Anyone finding errors or omissions in this publication should first contact the original registering member society. Approved amendments will then be made in the International Caspian Stud Book.

This information is copyright protected and unauthorised use is strictly prohibited.
